I did a 2-month internship at the Ministry of Labor and Social Security where I learn computer maintenance and installation of software setup without forgetting the installation of window operating system to finish, I work on a web application called attendance management and reporting system For my internship project for the HND.

PROFESSIOANL INTERNSHIP

FROM (1ST OCTOBER 2025 TO THE 31ST MARCH 2026)

I did a 6-month internship at the C&G Creative Technology it is a sole proprietorship enterprise that mainly deals with technology and more my internship was concerned with the building of web applications and computer maintenance where I increase my skill in software development I am actually building and E-learning web application for the enterprise.

ADDITIONAL INFORMATION / KEY HIGHLIGHTS

MedHunt Real-Time Pharmacy Inventory Locator (Android) Final Year Project *2025 – 2026*

- Designed and built a real-time Android platform that lets users search medicine availability across pharmacies in Cameroon, cutting the time to locate essential medicines.
- Implemented end-to-end home delivery and online payment via the Campay API, supporting MTN Mobile Money, Orange Money, and card transactions.
- Architected a pharmacy license-verification workflow (license number, document upload, pending/verified/rejected status, server-side filtering) to guarantee only licensed sellers appear in the app.

.

E-Learning Web Application C&G Creative Technology *Oct 2025 – Mar 2026*

- Built core modules of an E-learning platform end-to-end, from requirements gathering through deployment, as the primary developer on assigned features.
- Implemented course/content management and user-facing workflows, applying web development and database design skills in a live enterprise product.

Attendance Management & Reporting System Ministry of Labor and Social Security.*Jul 2024 – Aug 2024*

- Designed and built a web-based system to record staff attendance and generate reporting, delivered as the internship capstone project for the HND program.
- Handled the full cycle — data modeling, backend logic, and report generation translating a manual paper process into a digital workflow.

ADDITIONAL INFORMATION / KEY HIGHLIGHTS

- Strong proficiency in software development and programming (Java, PHP, JavaScript, HTML, CSS)
- Experienced in database management and data entry (MySQL)
- Skilled in system administration and IT maintenance
- Excellent problem-solving and analytical skills
- Ability to work independently and in a collaborative team environment
- Quick learner, adaptable to new technologies and IT workflows

LANGUAGE SKILLS

- French – Native / Fluent
- English – Intermediate / Fluent (speaking, reading, writing)

INTERESTS AND HOBBIES
